PURPOSE

get skills | get going | get work

This qualification will enable the qualifying learner to function as a member of a multi-disciplinary team as a multi-skilled health and skincare practitioner. The learner will be skilled in visual, tactile, verbal and assessment skills to ascertain the client's body and integumentary needs, in order to analyse the client's state of health, and formulate a specific regime or protocol for the treatment, prevention and/or maintenance of well being in the client.

Learners accredited with this qualification will be able to:

Apply communication skills to provide effective health and skincare treatments.

Demonstrate applied knowledge of microbiology, anatomy, physiology, physics, chemistry and psychosocial sciences.

Plan, implement and evaluate health and skincare treatments based on a holistic assessment of the client.

Participate in the promotion of holistic health care.

Maintain professionalism in health and skincare practice.

Participate and/or manage a health and skincare establishment. Intain high professional and ethical standards, by completing this programme, learners will be able to:

- Obtain systematic knowledge in Health and Skincare through an applied teaching approach.

Acquire a broad based work experience; and perform competently in the business environments to provide the necessary theoretical and practical knowledge and skills to enable the learner to follow career in the field of Health and Skincare and to provide the required skills to enter the small business enterprise nationally and internationally in this field of study.

PLANNING

get skills | get going | get work

The designing and planning of the Beautiko curriculum has five components that are interconnected and emphasized.

These components are:

- Outcomes
- Context
- Learning content
- Teaching and learning strategy
- Assessment

The curriculum includes the intended outcomes (exit level outcomes, specific outcomes and critical cross-field outcomes) for the purpose of learners to demonstrate and achieve these outcomes in theory, practical and case based components.

The learning areas of the learning programme,(which include units, lessons and the accompanying planning) cover three aspects -

knowledge, skills and attitudes (which include values).

The teaching and learning programme incorporates various planned activities and procedures which are incorporated to aid the trainer to help learners master the learning content.

DELIVERY

get skills | get going | get work

As part of the delivery of the qualification, trainers also use problem-based learning to improve problem solving skills and self directed learning development amongst learners.

Examples include : case-based instruction (case studies), project based teaching, essays, role plays and group discussions.

Technology is also used to promote learning in the form of media teaching (which includes the teaching in the use of products and equipment), during simulations and demonstrations on live models.

Beautiko's academic staff is committed to facilitate the progress of our learners at their own pace (through one-on-one instruction, individualised attention, workshops, re-takes, continuous assessment, guidance and mentoring.

The academic staff members of the institution are fully qualified to teach in the field of health and skincare therapy with both national and international qualifications.

Selected staff members are registered assessors and registered moderators.

LANGUAGE AND LEARNER SUPPORT

get skills | get going | get work

Beautiko College is committed to providing the support necessary to ensure that our learners are successful not only as learners but also as professional people about to enter the world of work and learner support is ongoing.

Beautiko strives to provide holistic support that includes:

Entry, orientation, academic, experiential learning, personal support, practitioners, tutors and mentors and administrative support.

The aim of the language policy is to ensure compliance with national and departmental legislation and policies regarding language.

At Beautiko, as an institution of education, training and development, we ensure that all instructional strategies, materials and aids which include: textbooks, study guides, notes, diagrams and audio-visual aids, are presented in English.

National and International assessments are also performed in English.

Formal and informal assessment measurements are done on an ongoing basis to monitor the learner's progress continuously

(includes formative, summative, holistic, observations and self-assessment, also for purposes of RPL and CAT)

Examinations are also conducted and moderated.

The success of learners are recorded and reviewed as part of the QMS.

BEAUTIKO COLLEGE

FULL TIME PROGRAMMES

ASSESSMENT

get skills | get going | get work

Assessment integrates work-experience with academic learning and apart from the assessment of theoretical and practical components, also includes the assessment of research assignments, projects, portfolios and case studies.

Learners are expected to attend both theoretical and practical classes of all the units covered in the curriculum.

Missed hours have to be worked in for entry into the examinations. Formative and Summative theoretical and practical evaluations are taken at the end of each semester with a final formal evaluation at the end of the fourth semester.

The final year mark consists of a weighted contribution of each of the semester assessments as well as various assignments throughout the year.

A final year mark of 50% in all practical and theoretical units is required.

Successful candidates meeting the standards of the set out criteria will receive the appropriate certification.

Re-takes will be allowed under special circumstances.
